Just because a man chooses a woman for a mate doesn't make him a captain.

Lions Column

ONE THING that everyone should take time for is some form of community service, either individually or through taking an active part in a service organization.

Although there is little public recognition or personal thanks for the individuals' efforts, there is a certain inner sense of accomplishment and satisfaction which comes from helping others. LIONISM as an example of what can be done by an organized group of men, each willing to give a small part of his time to the service of others.

According to the official report there were 85,067 separate activities sponsored and completed by Lions in the fiscal year 1946-47. Carbons activities were included and although small in number we assume it is only the beginning of what we hope to do but it is like a new car, it may look sleek in appearance and it may have a powerful motor, but it will not run without help, so the Lions Club in Carbon needs help in its undertakings if it is to help others in its endeavors to make it a better place to live in.

To end I would like to mention two questions, viz:

Does Carbon want to improve? Does Carbon want a service Club?

Lion Frank

Beiseker News

Mr. and Mrs. Joe Selsler of Kelowna, B.C. were visiting friends and relatives in Beiseker.

Robert Boyd who is attending Normal in Calgary was home for the week-end.

Mr. and Mrs. Gottlieb Landsiedel of Delburne visited with Mr. and Mrs. Scheffelmair. Mrs. Landsiedel is Mr. Scheffelmair's sister.

Miss Ida Scheffelmair of Calgary was a week-end visitor at the home of Mr. and Mrs. John Scheffelmair.

WEDDING

St. Mary's Church, Beiseker, was the scene of a pretty wedding January 14th when Eleanor Arnott, youngest daughter of Mr. Arnot and the late Mrs. Arnott, Edmonton, became the bride of Leo A. Selsler, eldest son of Mr. and Mrs. Jacob Selsler, Beiseker.

Rev. A. E. Tennant officiated at the marriage ceremony and celebrated the nuptial mass.

The bride, who was given in marriage by her brother-in-law, Hubert Collins, Calgary, was charming in a floor length gown of white satin, full length lily point sleeves, full flowing skirt with deep V shaped peplum at front and back. Her long veil, held in place by a wreath, was worn cap fashion with a large bow at back of neck, and carried a bouquet of American Beauty roses. Her only ornament was a gold wrist watch a wedding and graduating gift of the groom.

Her sister, Mrs. Hubert Collins, was bridesmaid and chose a corresponding gown of sky blue satin with matching head-dress and carried a bouquet of pink carnations.

The groom was attended by William Perks, Morrin.

Miss Anita Schmaltz played the wedding march and Felix Hagel played the wedding music during the mass.

A wedding dinner was held at the home of the groom's parents for the immediate relatives and friends. A three-tiered wedding cake centred the bride's table. The toast to the bride was proposed by Rev. A. E. Tennant and responded to by the groom.

The groom's gift to the bridesmaid was silver earrings and to the best man a gold tie clip and pin to match.

For the occasion the groom's mother chose a black crepe dress with a lace inset yoke and her corsage was of yellow roses.

A reception followed in the evening attended by 50 guests, after which a wedding dance was held in the community hall. Later the bridal couple left on a short honeymoon and on their return will reside in Edmonton.

Out of town guests included Mrs. Andrew Schwartzburger Brooks; Mr. and Mrs. Carl Selsler and Mr. and Mrs. Joe Selsler, Kelowna, B.C. and J. Foley, Sheppard.

OFF THE RECORD

It seems that, under Communism, Russian women can't leave their country to marry outsiders since they are supposed to be born, live and die as Communists. Have they no ambition?

Church Services

CHRIST CHURCH, CARBON
Sunday, January 25, 11:00 a.m.
Canon T. B. Winter.

CARBON NEWS

The Junior Ladies' Aid will hold their Annual Spring Bazaar in the Scout Hall, March 20th.

Residents whose coal bins are near the empty stage are appreciating the chinook we have been favored with the past few days.

There will be a meeting of the Carbon Junior Grain Club in the Village Office on January 24th at 2 p.m.

Carbon Old Timers are sponsoring a dance in the Scout Hall on Feb. 11th.

Bob Shaw was elected president of the AYPAs at a recent meeting. Frank Emery is vice president, Miss Lucy King is secretary and Mrs. E. Holmes is treasurer. The club will hold a whist drive in the basement of Christ Church Jan. 26th.

Miss Joan Heath of Calgary was a week-end visitor in Carbon.

Chris Thumbert received a bad cut on the forehead when he was struck by a puck during the hockey game Sunday. Four stitches were required to close the wound. Trochu won the game 11-2. Carbon defeated Huxley 5-1 last Wednesday but lost a game to Beiseker 8-2 on Monday evening.

Mrs. F. Fuller and Mrs. Jas. Bushby were Calgary visitors this week.

Buster Simpson attended a Massey Harris short course in

Calgary last week.

The curling rink skipped by Norman Nash won the Bika competition at the Rockyfordspiel and reached the jewellery in the Delveres event.

Harold Greenlee and Marilyn Hay were the winners in the senior section of the Amateur Contest held in the Scout Hall Wednesday evening. Bob Gilhauser and Leon Sigmund were the junior winners.

Don't fail to see Mrs. Carl Schmaltz's troupe of skaters at the LIONS Carnival on February 4th.

Mr. and Mrs. C. Graham celebrated their wedding anniversary on Wednesday evening.

Officers Named

The Senior Ladies' Aid of the Carbon United Church recently elected the following officers. Honorary president, Mrs. S. N. Wright, Sr.; president, Mrs. L. Poxon; 1st vice president, Mrs. D. Rusler; 2nd vice president, Mrs. W. Milligan; secretary, Mrs. S. Torrance; treasurer, Mrs. A. McLeod; manager committee, Mrs. W. Milligan and Mrs. F. Bessant; visiting committee, Mrs. J. Anderson and Mrs. S. N. Wright, Sr.

The Ladies' Aid of Christ Church, Carbon, elected the following officers: President, Mrs. F. Emery; vice president, Mrs. Heath; secretary treasurer, Mrs. Jas. Cooper.

THE WINNIPEG GRAIN EXCHANGE IS A MEETING PLACE—

Except that business is done on a larger scale, the Grain Exchange is similar to a town or village market where farmers bring in produce to sell and the public go to buy it.

The Exchange itself neither buys nor sells grain. Nor is it a profit making institution.

Nobody in the Trade is asked to become a member. It is entirely a voluntary association of men engaged in buying, selling, handling, processing, storing, financing, shipping, importing and exporting grain. The Exchange is their common meeting place where business can best be done economically and without loss of time. Every member of the Exchange serves the interests of farmers in one way or another.

While a few men who farm on a large scale are members of the Exchange most farmers, when they wish to buy or sell grain, employ a Commission Agent, Elevator Company, Co-operative or Pool to act as their Agents.

All "Pools" are members of the Exchange and use all of its facilities. They couldn't get along without the Exchange—and they know it.

The Exchange has been in operation for sixty years and is world famous because of the high standards of conduct observed by members.

Farmers are cordially invited to visit the Exchange during trading hours, 9:30 to 1:15 p.m. Ask to see the President or Secretary, or any Member. Ask questions. Straight answers will be given.

Our members favour a floor price for wheat, administered by the Canadian Wheat Board. But they also believe that farmers should have the opportunity to get top world prices NOW, through open markets, while prices are high.

The more farmers know about the Exchange, the better for all concerned. Meantime mail the coupon below for booklet explaining the Canadian Wheat Board Act. It explains how farmers are regimented and controlled by it, in its present form.

To The Winnipeg Grain Exchange,
Winnipeg, Manitoba.

Please mail booklet to which you refer above.

Need For Conservation

"CONSERVATION" IS A TERM WHICH IS HEARD more and more frequently in this country in connection with our natural resources. Because of the fact that we are so generously endowed with fine farm lands, great areas of forest and rich mineral deposits, Canadians have, in the past, been inclined to give little thought to the possibility of there ever being a time when these resources might become exhausted. In more recent years it has become apparent that greater concern must be given to conserving our heritage of natural resources, upon which so much of our present prosperity and our hope for the future depends. A great deal has already been heard in the West regarding the need for soil and moisture conservation, and much practical work has been done in this connection.

Extends Over Whole Country

It has been realized that even the rich soil of the prairies cannot produce indefinitely without having essential elements returned to it, and that rivers and streams must be diverted by man to provide land with needed moisture. The problem is general in all parts of the country. For some years now we have heard of extensive programs for forest conservation, in an effort to replace the many trees which were wasted through careless methods of lumbering or through uncontrolled forest fires. Conservation is also important in connection with our great mineral resources. In Canada present consumption of some minerals is increasing faster than they are being mined. It is now realized that there is much coal left in mines which have been abandoned, and that this coal cannot be reclaimed. Similar waste has taken place in other types of mines. Advanced techniques in mining and modern methods of reclaiming used metals and utilizing lower grades which are mined, are now helping to conserve Canada's mineral resources.

Problem Is Of Vital Interest

It is important that Canadians should realize that this is a national problem and one in which everyone has a vital interest. Farming, lumbering and mining are our great basic industries. Thousands of citizens are engaged in them, and thousands more gain their livelihood through the manufacturing, shipping and selling of the products of our lands, forests and mines. Canada is still a young country and its people have always worked with optimism and faith in the future. At times there has been, and no doubt there still is, a tendency to do too little planning for the future, and to give too little thought to the need for making sure that in the future Canada will not be impoverished because of selfish and short-sighted methods of developing our natural resources. Co-operation on the part of the people, in whatever we may be asked to do in the way of conserving our natural resources, will make for better times now and in the future.

Grand Relief FROM SNIFFLY, STUFFY DISTRESS OF Head Colds!

DOUBLE-DUTY NOSE DROPS WORKS FAST RIGHT WHERE TROUBLE IS!

Instantly relief from head cold distress starts to come when you put a little Va-tro-nol in each nostril. Also—it helps prevent colds from developing if used in time! Try it! Works fine! You'll like it!

VICKS VA-TRO-NOL

FORECAST INCREASE

OTTAWA. — A "substantial increase" this year in advance payments on grain purchased by the Canadian wheat board was forecast in the commons by Trade Minister MacKinnon. There has been speculation that the price will be boosted 20 cents to \$1.55 a bushel.

Elephants like onions as much as they like peanuts.

Good Health and Lots of Pep

Dr. Chase's Kidney-Liver Pills

ARE YOU DISCOURAGED because you suffer distress from 'periodic' FEMALE COMPLAINTS

which makes you NERVOUS HIGH-STRUNG on such days?

Are you troubled by distress of female functional monthly disturbances which makes you suffer, feel so nervous, cranky, restless, weak—at such times? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms!

In a recent test it proved helpful to women troubled this way. Why don't you get smart and try it yourself? Pinkham's Compound is what is known as a uterine sedative. It has a soothing effect on one of woman's most important organs.

Lydia E. Pinkham's VEGETABLE COMPOUND

FUNNY And OTHERWISE

"You were married in a cage of lions?"
"Yep."
"Exciting?"
"Was then, Wouldn't be now."

The sailor was writing home to his parents. He asked his mate, "How do you spell 'financially embarrassed'?" His mate turned with nonchalance and replied, "B-r-o-k-e."

A writer wonders why his baby son keeps trying to put his foot in his mouth. It may be Nature preparing the little man to make both ends meet later on in life.

"Mary my husband came home very late last night. Can you tell me what time it was?"
"Well, ma'am, I don't know exactly, but when I got up this morning the master's hat was swinging backwards and forwards on the hatstand."

Father: "How on earth did you get Junior to take that medicine—tell him it was candy?"
Mother: "Certainly not. I put it on the highest shelf in the house, and told him it was deadly poison."

"Can I borrow your carpet-beater?"
"Sorry, no—he's busy in the garden."

Jack: "So your father objected at first because he didn't want to lose you?"

Ethel: "Yes, but I won his consent; I told him that he need not lose me, we would live with him, and so he would not only have me but a son-in-law to boot."

Jack: "H'm! I don't like that expression 'to boot.'"

NEW SOVIET ENVOY TO UNITED STATES—New Soviet ambassador to the U.S., Alexandre S. Panushkin, who arrived in New York recently, in discussing the likelihood of improved relations between Moscow and Washington, optimistically said, "Everything is possible under the sun." Then he stopped off to see Andrei Gromyko, whose vetoes are familiar at U.N. sessions, before heading for Washington.

That's Married Life!

MADISON, Wis. — Two police officers, Ray Case and Donald Harles, took a lot of joshing when they returned with their wives from deer hunting in northern Wisconsin this fall. Their wives each bagged a deer. They got none.

Brazil was discovered in 1500 by Cabral, a Portuguese navigator.

Canada Air Letter Service Extended

OTTAWA.—The "Canada air letter" service, previously confined to mail going to the United Kingdom and Eire, is being extended on a world-wide scale, the post office department announced.

For the standard 10-cent rate, Canada air letters may be sent after Jan. 1 to Bermuda, the British West Indies, Cuba, Mexico and Central and South America.

For 15 cents, they may be sent to all countries in Europe, Asia, Africa and Oceania.

The service will not apply to destinations in Canada, the United States or Newfoundland, because existing rates are cheaper.

Earthquakes occur somewhere around the globe at the rate of about 8,000 a year.

HUNTING RESTRICTED IN ARCTIC AREAS OF CANADA

TORONTO.—Taking in most of the Arctic islands and a large slice of the adjoining mainland in those chilly latitudes, Canada has established a game sanctuary where only the Eskimos and the R.C.M.P. are allowed to hunt—the Mounties in a restricted degree.

Seals, the Eskimo may slay without limit, for they are his main aid to existence and so wary he can never exterminate them. But his ruthless slaughter of walrus has compelled the federal government to limit his bag, nowadays, very radically.

And a former waste is sternly frowned upon—an Eskimo is forbidden to feed Arctic salmon trout to his dogs.

WORLD HAPPENINGS

BRIEFLY TOLD

Princess Elizabeth and Prince Philip have given to charity all the cash that was sent them as wedding presents.

To warn him of poultry thieves a resident of Gravesend, England, has installed electrically-operated bells in his chicken run.

Canadian labor's pay envelope was swelled by some \$600,000,000 in the first nine months of 1947, as compared with the same period in 1946.

Johann Hoffman, a former Krupp tank designer, testified at an American war crime trial that Krupp-made tanks were secretly taken to Russia in 1932 for trial manoeuvres.

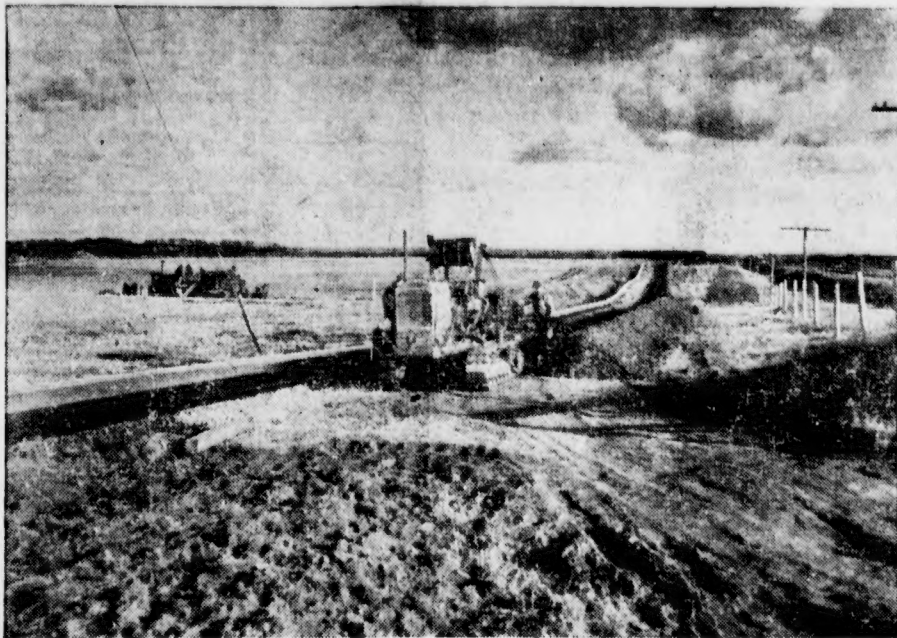

Four Canadian army officers will begin one-year staff courses early in the new year in England and Australia, Hon. Brooke Claxton, defense minister, announced.

Ice cream production in Canada during November amounted to 1,170,000 gallons, compared with 666,000 in the like month of 1946, according to the Dominion Bureau of Statistics.

PARIS.—Rene Mayer, finance minister, announced a special 400,000 franc (\$3,360) yearly tax on night clubs and new levies on gasoline, precious metals, alcohol, spices and other luxury products.

The United States and Great Britain have agreed to buy up to 70,000 tons of fish from Iceland for consumption in the combined British-American zones of Germany during 1948.

Canada's "Big Inch" Being Laid Across Prairies

Pace against frigid blasts of winter was staged by engineers to lay 100 miles of pipeline from Kinsella to Edmonton. Pipe, which will carry 66,000,000 cubic feet of natural gas daily, is being buried in four-foot trenches to guard against the cold.

CHIP REMOVED FROM LUNG AFTER MANY YEARS

SYRACUSE, N.Y. — When Roy Brown was 16, he swallowed a chip that flew into his mouth while he was chopping wood. It didn't bother him. But recently, Brown, now 51, began having lung trouble. A Syracuse surgeon, disclosed he had removed a petrified particle of wood from the upper lobe of the right lung. The surgeon said the particle had made a 90-degree turn into the lobe, after Brown swallowed it 35 years ago. Brown is recovering at home.

SCIENTISTS TEST HEAT FOR JET PLANE PILOTS

LOS ANGELES.—Scientists at the University of California at Los Angeles announced they had spent nearly 15 minutes in a room heated to 250 degrees Fahrenheit without any ill-effects.

Dr. Craig Taylor, spokesman for the group, said the experiment was sponsored by the air corps to determine if jet plane pilots can be acclimated in heat chambers to endure supersonic flight. He said that it would be 160 degrees hotter in a jet plane than the air outside at a speed of 1,000 miles an hour.

NEWEST USES FOR WOOD DESCRIBED BY FORESTER

MINNEAPOLIS. — New uses for wood were described by C. A. Gillett, chief forester of the American Forest Products Industries Association, in a talk at the national meeting of the Society of American Foresters. Among the latest, he listed a new flooring composition made from powdered tree bark and wrapping paper made from bark.

Wants Five-Year Closed Season On Wild Fowl

Harvard Scientist Believes This Necessary In Order To Conserve Ducks

NEW YORK. — A five-year closed season on wild fowl hunting would quadruple the supply of birds, in the opinion of Dr. Ludlow Griscom of Harvard. Otherwise, he says, an increasing number of hunters will continue to shoot a decreasing number of ducks until the sport dies a natural death.

Dr. Griscom, research curator of Harvard's zoology department, doesn't give the five-year moratorium an outright endorsement in the January issue of Field and Stream, but he does point out that the shooting pressure must be kept down for several years until the desired increase in duck population is reached.

The Harvard scientist estimates that 97½ per cent. of the hunting season of 40 years ago already has been lost. Then a hunter was permitted 28 birds a day during the seven month season. In 1947 the bag limit was four, with the season held down to 25 days.

Because the number of hunters has leaped from 40,000 to 2,000,000 from 1908 to 1947, even the curtailed shooting means a theoretical maximum kill of 200,000,000 birds—twice the number of targets estimated by Ducks Unlimited, Inc., at the start of the 1947 shooting.

Answer To Last Week's Puzzle

LITTLE REGGIE

PRISCILLA'S POP— Challenge Of Youth

Fashions

ONE SIZE - MEDIUM

By ANNE ADAMS

Prize Winning Apron

First prize for beauty plus utility goes to Pattern 4874. Half apron takes only one yard fabric; with button-on bib, ½ yard more. For gifts, bridge prizes, bazaars, embroider these lovely roses!

This pattern, easy to use, simple to sew, is tested for fit. Includes complete illustrated instructions.

Pattern 4874 comes in one size, medium. Embroidery transfer inc. Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

SELECTED

RECIPES

PEANUT CREAM FROSTING

¾ cup butter, washed in cold water to remove salt
1½ cups sifted confectioners' sugar
½ cup peanut butter
Cream butter, add 1 cup sugar gradually, and cream until very light and fluffy. Stir peanut butter until blended; add to frosting, a small amount at a time, creaming well after each addition. Fold in remaining sugar. Makes enough frosting to cover top and sides of 13x9x2-inch cake, or tops of two 8-inch layers, or tops of about 4 dozen medium cup cakes.

2758

Carbon Coal Feeds Utilities Furnaces

A gang of men and trucks have been busy all week hauling slack from the mines at Carbon to feed the big furnaces of the Canadian Utilities power plant in Drumheller. Light and power have been cut to a minimum at all points served by the utility.

The Drumheller plant burns

about 170 tons a day and according to information received today there is only sufficient fuel on hand to run for a day.

Should fuel not be obtained at Carbon the entire circuit would be "black-out".

The coal shortage is caused by a walk out of miners

In Carbon the lights are cut out at the curling and skating rink, although skating is still permitted. What street lights we have are cut off.

Don't you love driving on a night like this?

Yes, but I thought I'd wait until we got farther out in the country.

Only One Cure For High Prices

Screaming about high prices will not help us. Hard work and prayer are the only effective cures. The world is short of goods and harvests and until that situation is corrected general price levels cannot possibly recede.

Canada and the United States could, if they desired, forget about the rest of the world. They could stop the flow of goods and food to Europe, sit back and revel in their own plenty. They alone of the nations of the world have the capacity and production to do this just now. But such a callous course would soon bring its own reward. There can be no permanent peace, prosperity and happiness for North America until Europe is rebuilt.

And Europe is very far from being rebuilt today. That continent is short of food, machinery, coal, steel, houses, transport, fertilizer and of almost everything else except trouble. It's going to be a long hard pull to put Europe on its feet, we might just as well face the fact that until that job is done we are going to be short of food and goods on this continent and prices are going to continue to be high.

Our job in Canada and the United States is to produce more industrial goods and pray for good crops. With luck and hard work we can do much this year and next, without them the outlook is bleak.

Hutterites Fined

Four members of the Springvale Hutterite colony near Beiseker, were each fined \$25 and costs by justice of the peace B. C. Henriks at Irricana Monday when they were found guilty of breaking a quarantine imposed on the settlement.

Brought into court were John Wurz, Mr. and Mrs. Sam Wurz and Chris Gross. The colony had been quarantined after an outbreak of diphtheria amongst its members.

Distributed Responsibility

Distribute the wealth, that is the totalitarian way. Distribute the responsibility, that is the democratic way. They are both quite different but both tend to break down.

Those who favor equal distribution of wealth lose interest when they find how little wealth they get and begin to live under rationed scarcity. Those who favor democratic sharing of responsibility lose interest when they find how much responsibility they get. They revert to irresponsible grabbing for themselves, an open invitation to dictators and bureaucrats to step in and take control.

Looking Into the Matter . . .

You'll find that the tried and true recipe for thrift is to shop the EATON way.

It's a Canadian dish—known from coast to coast, and one that the whole family shares.

Since 1860 the organization has grown with Canada; and through its Mail Order is available from coast to coast. EATON'S aim always has been to offer quality unsurpassed at the price in fashions, furniture, equipment for farm or home; and every sale is made with that familiar reassuring guarantee—

"Goods Satisfactory or Money Refunded, Including Shipping Charges."

T. EATON CO. LIMITED

EATON'S

This vicious cycle can be broken in the democratic way only by men who place responsibility for others ahead of riches, ease, and comfort for themselves. There are farmers who harvest unprofitable crops so that others may have more to eat. There are wholesalers who move surplus stock at prices which benefit only the purchaser. There are manufacturers who put people before profits and produce to meet human needs rather than a financier's approval. There are retailers who, in spite of rising costs, take as much loss as they can themselves in order to hold down the rising price spiral.

Such men, dividing the responsibility for conserving and creating wealth are the men who hold democracy against totalitarian invasion. Are you taking your share of this responsibility? Or are you simply demanding a larger share of democracy's benefits while paying nothing of its costs?

BEISEKER NEWS

The Beiseker High School boys defeated the Kathryn boys on January 14th by a 2 to 1 score. The Beiseker goals were made by Leonard Schmaltz in the first period.

The Acme boys defeated the Beiseker juniors by a 10 to 2 score. Leonard Schmaltz made two goals in the last few minutes of the final period.

Herman Carry scored five goals for Acme. Herbert McKay got three and Ernest Carry two.

2, 4-D and Weed Control

Two years of extensive work with 2,4-D in the laboratory and the field have shown this chemical to be a powerful tool in eradicating and controlling many weeds. 2,4-D is popular mainly because of one property selectivity. When used at proper concentrations it will destroy broad leaved annual plants like mustard and stinkweed and will leave unharmed narrow leaved plants like cereals and grasses. The cost is generally less than \$1.00 per acre for chemical.

When 2,4-D first became available various types of applicators were used which required from 80 to 100 gallons of water per acre. Now however machines have been developed that use from three to five gallons of water per acre and still do an efficient job of weed killing. The type of machine generally recognized as best for this purpose is a boom sprayer equipped with low pressure, low volume nozzles.

In order of effectiveness the formulations of 2,4-D in common use rank as follows (a) Esters of 2,4-D (b) Amines of 2,4-D (c) Sodium Salts of 2,4-D. The Esters of 2,4-D are preferred because of their quicker action in penetrating the system of the weed plant. Because of their quicker penetration the esters of 2,4-D are less likely to be effected by adverse weather conditions.

There are a number of other factors that effect the use of 2,4-D in weed control and these will be covered in articles to follow

AUDITOR'S REPORT

I, C. V. Milne, C.A., do hereby certify that I have examined all the books, vouchers, minutes of meetings, etc., of the Carbon School District No. 1218 of the Province of Alberta for the year ending December 31, 1947 and that I have found vouchers or legal authorization for all the items.

And I further certify that I have counted the cash on hand and have examined the bank books or obtained information from the bank regarding the bank balance on hand amounting to \$131.04 over-draft. The outstanding cheques total \$231.14.

I further hereby declare that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the School District according to the best of my information, the explanations given me and as shown by the records of the District.

World News In Pictures

BOY BISHOP — Elected "bishop" at the St. Mary of the Angels Song school at Addlestone, England, Thomas Wrightson, 14, gives his blessing. The ceremony revived a 1,500-year-old custom and Thomas held the office through the Christmas season. The custom began when Nicolas, now Santa Claus, was bishop of Myra in Asia Minor.

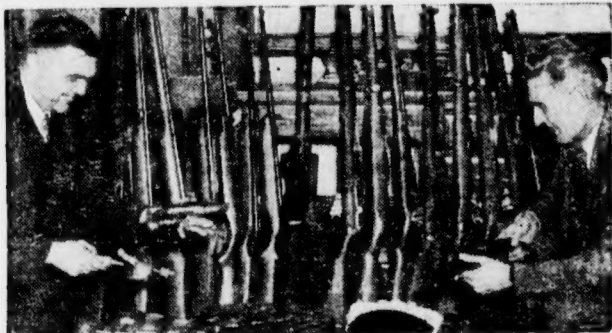

URGE FRATERNAL RELATIONSHIP—U.S. Secretary of State George C. Marshall, (right), and Sir Stafford Cripps, Britain's chancellor of the exchequer, shake hands on their arrival for the Pilgrims' Society dinner, given in Secretary Marshall's honor. Earlier in the day the U.S. diplomat had to listen to Russia's Molotov heap vilification upon the United States and Britain. Speaking after dinner, Secretary Marshall urged the British and American people to proclaim their "fraternal relationship" to the world without fear of criticism. Absent from the dinner was Molotov, who said he was "too busy" to attend.

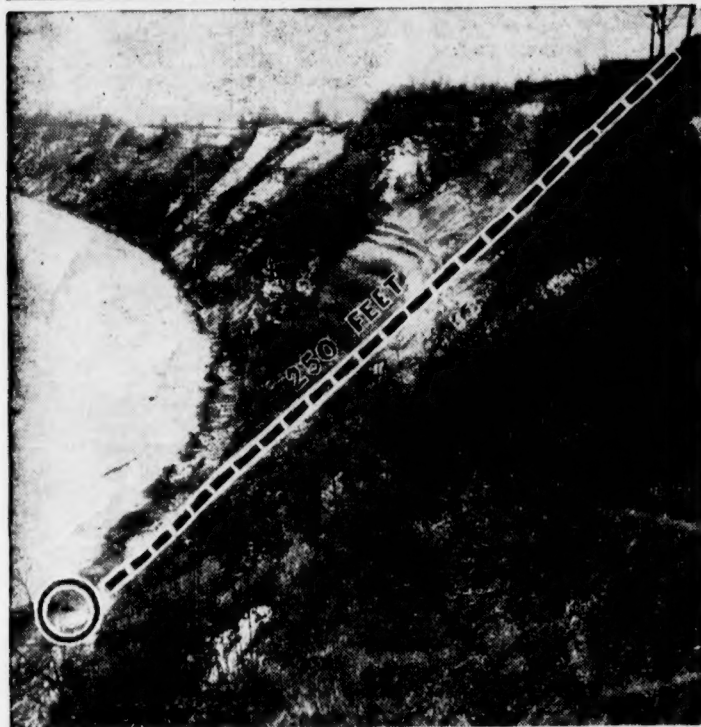

CLUBS USED IN ROME RIOTS—A Rome policeman swings a club at a Communist "activist", a member of an anti-strikebreaker squad, who was urging strikers to block outgoing trains in Rome. The clash was but one of hundreds as police rounded up Red agitators and carried them off to jail.

PEACEMAKER—Hope for an end to the violence in the Holy Land is seen in the written appeal of Dr. Yussuf Haikal, Arab mayor of Jaffa, to Israel Rokach, Jewish mayor of nearby Tel Aviv, urging a truce. The letter was sent by armored car after the British issued a "shoot on sight" order to troops patrolling the "no-man's-land" that lies between the two cities.

POLICE UNCOVER 'TEEN-AGE ARSENAL' — Hamilton police have arrested seven teen-agers after digging up more than \$1,000 worth of arms, tools and ammunition in a garage used as a clubhouse by the boys. "They evidently had no criminal intent," said Det. William Stamp. "It was more a mania for collecting souvenirs." All names were withheld. Much of the loot, including 16 naval rifles, rope ladders and 1,200 rounds of ammunition, was taken from the Sea Cadet barracks. A heavy 50-calibre German machine gun, taken from a railway car loaded with scrap, had been put in operating condition by the boys. Shown above is some of the recovered loot.

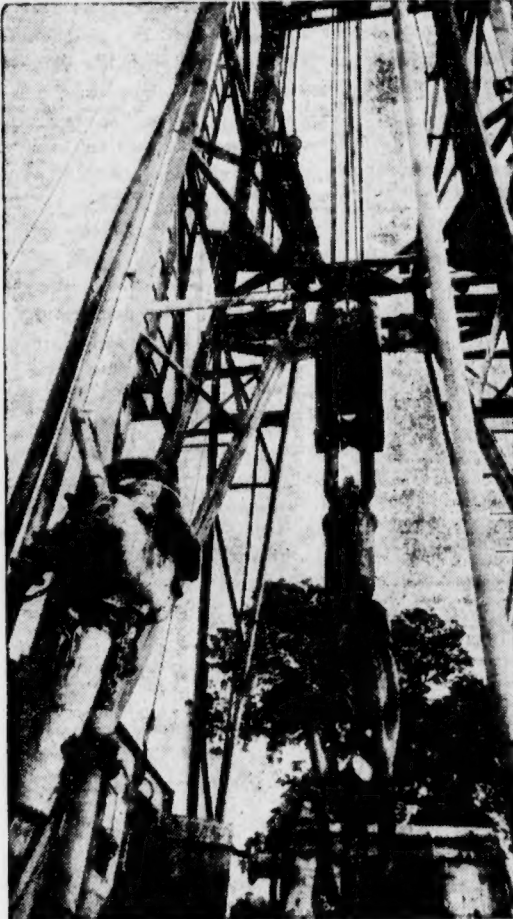

CANNOT RECALL 250-FOOT PLUNGE OVER CLIFF—250-foot fall down the Bluffs at Scarboro, Ont., in his car which was wrecked, left Bruce McLean with a broken arm and no memory of the accident. On his way home from a party, he regained consciousness scaling the cliff. He managed to climb it on second attempt. Car is shown in circle.

Bruce McLean told police he did not know where car was, or how he got down cliff.

TO KEEP CHURCHILL SMILING—A black Buddha statue, to "help keep him smiling," was willed to Winston Churchill by Gen. Sir Ian Hamilton, veteran of five wars, who died last October at 94. The statue was taken by Sir Ian from a Burmese temple in 1886. He thought Buddha's "placid" features would have a calming effect on Mr. Churchill "in the worst stress of politics."

DRILLING BRITAIN'S OIL—Joe Green, one of the drillers on the Eakring, Eng., oilfield, stands on a platform of one of the American unitized drilling rigs. These rigs, with 4½-inch drill pipes, give the maximum mobility and are designed to drill 5,000 feet.

ROMANCE RUMORS PERSIST—Rumors of the engagement of King Michael of Romania and Princess Anne of Bourbon-Parma persist, in spite of denials from Romania. The princess, a resident of Copenhagen, was seen frequently in the company of the king while both were in London for the wedding of Princess Elizabeth. Russian reaction to the marriage is said to have some influence on Michael's refusal to admit the romance.

CHRISTMAS TRAGEDY—Party to be held at Hepworth school for which Robert Cohen, 13, and brother Donald, 7, set out to get a Christmas tree was called off while the shocked community grieves, when the boys' frozen bodies were found in a marsh, a short distance from their home.

JET FIGHTER FOR CARRIER PLANES — This is the U.S. navy's newest carrier-based jet fighter, the Grumman "Panther". It is powered by the most powerful jet engine in the world and capable of speeds over 600 miles an hour. The "Panther" has a trimly streamlined fuselage, with the traditional Grumman square-tipped wings, which fold for shipboard accommodation. Novel construction features are a highly functionalized cockpit and the movable leading edge of the wing, known as the "droop snoot", which moves in conjunction with the wing flaps in landing and takeoff, providing improved stalling characteristics and added lift. This plane was equipped with a Rolls-Royce turbo-jet engine, developed by the British and to be produced in the U.S. by Pratt and Whitney.

OUR COMPLETE SHORT STORY—

HABIT

By KATHRN BENIS

AT five-thirty p.m. as usual, George Madison left the First National Bank of Crosstown. He started up the busy street with that deliberate tread of his, then swung back to the corner. It might look suspicious to change his ways tonight.

"The same, sir?" asked old Tim, blind since the battle of the Marne in the First World War.

"Yes," said George, wincing as his nickle banged the tin cup.

"A bit cool for April," offered Tim, handing up the Crosstown Evening News. "Get to know weather, don't we—being out in it every day like me an' you. Say—jus' how many years you been comin' from the First National to get my papers?"

George started, paled. Couldn't let on to the old fool that after tonight he wouldn't be around, couldn't explain that after tonight he'd be a free man, a man of means, no longer a slave. Only thing you could call a bank teller, wasn't it?

"It's—it's about 15 years," came from George's dry lips.

"No doubt the bank folks are pretty fond of you by this time," commented Tim. "They're mighty nice to me, too—from the president down."

"Yes, of course," chopped out George, swinging away.

Mrs. Murrey's gloomy boarding house irritated him more than ever tonight. The worn strip of Brussels on the front stairs, the odor of baked beans—always beans on Tuesdays. The bare neatness of his small bedroom—with its golden oak furniture, his row of biographical and statistical books topping the rickety desk, his worn leather slippers beside the bed, the faded blue counterpane, all filled him with disgust. Genteel pov-

erty! Smart men didn't know poverty!

His reflection in the wavy mirror over his dresser startled him. He ran a broken-toothed comb through his mousy brown hair. Blue eyes stared accusingly back at him, glassy eyes set in a thin drawn face. His short-clipped moustache twitched. The comb clattered to the floor. "Nerves! Nerves!" he muttered. "Got to get on the beam! Can't make a botch of things!"

But after warm food and lively table conversation with the other boarders who believed in him, his confidence rose. He was able to let himself into the First National that evening, nearly as calmly as he'd done hundreds of former evenings. Only this time he would not be working overtime for his superiors. Just for himself.

Finally, he was stuffing big rolls of currency into a travelling bag. He hoped his luck would hold, that Henry, the night watchman, would doze in the back room, as usual.

His luck did hold. It held so well it was uncanny. Even his aged automobile ran perfectly till close to daybreak, when he abandoned it and hopped a fast freight for the west. His chief objective now was to reach a certain man highly skilled in plastic surgery, a man who'd do anything for a price.

"Your own mother wouldn't recognize you," said the man, as George left the cabin hidden on a lonely country road.

George tried to smile, but his face still hurt and this reference to an adored mother he'd lost when a child was irrelevant.

George Madison now became James Farnum. His hair was bleached white, his upper lip was smooth-shaven, his once good-looking nose was unpleasantly aquiline. Even his voice was higher pitched. He not only looked different, he felt different. He was rich. He had close to one hundred thousands dollars.

In Alaska, he went into fur trading, became surprisingly prosperous. He remained a bachelor and avoided making close friends. Three years of this and he grew restless. He went to Chicago, then to New York and took in the best shows and night clubs. In a Fifth Avenue bar, he ran into Ed Ratchet, former clerk in the old First National of Crosstown. He talked with him at length and wasn't recognized.

So he decided to return to Crosstown and take a look around. After all it was his home. The very thought of the provincial little berg filled him with nostalgia.

He put up at the Crosstown Hotel with no questions asked. In the hotel lobby, on the streets and in the shops, he was treated like any stranger. "What a cinch!" he told himself, on a dozen occasions.

One day as he passed the bank, he saw old blind Tim sitting on his customary corner. Tim was selling a newspaper to a strange man. "Guess I'll drop a five-spot in Tim's cup for luck," decided George. It gave him a warm feeling inside to be going toward old Tim again.

But as he paused before him, Tim

leaped up and grabbed George's beautifully tailored sleeve. He cried, "George Madison! It's George Madison!"

"Let me go! I'm James Farnum!" exclaimed the terrified George, trying to pull away.

"What a break!" said the strange man, holding out handcuffs. "I've been looking for you a very long time! Thought you might blow back—they generally do!"

"Plain clothes, eh?" sneered George. "I'll prove you're wrong—I'll sue—I'll—"

"Can't fool me," piped up old Tim. "I get to know a man's footsteps after hearing 'em for fifteen years!"

(Copyright Wheeler Newspaper Syndicate)

MANY SETTLE IN BRITISH COLUMBIA DURING 1947

VICTORIA.—A total of 7,995 families receiving family allowance came to British Columbia during 1947, while 2,932 left for other parts of the Dominion, according to W. R. Bone, regional director of family allowances.

Alberta heads the list, both for transfers in and out, sending 2,594 families and receiving 1,198.

Saskatchewan was second with 2,449 leaving for the coast and 566 leaving for that province. Total payments of allowances in B.C. for 1947 amounted to \$17,612,696.

NO SKIING FOR SHANE—Shane Alexander, 12-year-old son of Viscount Alexander, Canada's governor-general, had a peek at the snow-covered hills around Ottawa in 1946. Ever since then he has been talking about the holiday planned for him this year in which he would leave England, and ski on those Canadian hills. But just before he was to leave England, he caught a cold, was put to bed. There'll be no skiing for Shane this year.

WINNIPEG.—Hilda K. Kinney, president of the Manitoba Teachers' society, issued a statement asking for better salaries and a definite schedule of payments for Manitoba teachers in 1948.

Western Briefs

THE PAS, Man.—A diesel-engined train, first ever used on the Hudson Bay Railroad, has completed its first run from here to Churchill, Man. The United States army owns the 15-car train which includes a hospital and medical car.

REGINA.—Ten Saskatchewan teachers have exchanged positions for the year with teachers from the United Kingdom, New Brunswick and Ontario, Education Minister W. S. Lloyd said. Three of them have gone to Great Britain, five to Ontario and two to New Brunswick.

PENDER ISLAND, B.C.—Pender Island is ready for next summer's tourist traffic. Repairs to the Port Washington dock have been completed, a new float is installed at Hope Bay double the size of the previous float, and a complete new dock and float has been built at South Pender.

RICHMOND, B.C.—Publisher of the Richmond Times, weekly newspaper, killed his Christmas edition because his six-year-old son contracted scarlet fever. Gordon le Breton, the publisher, felt he could not take the chance of spreading the disease.

Hammocks were invented by Indians in the Amazon basin. 2753

It's here! New Fleischmann's Royal Fast Rising Dry Yeast, the modern granule form that's always there when you want it. No need to keep it in the icebox—New Fleischmann's Royal Fast Rising Dry Yeast stays fresh in the cupboard for weeks—ready at any time for speedy action. Just dissolve according to directions on the package: IF YOU BAKE AT HOME—you'll be amazed at its fast rising action—delighted at the delectable flavor, finer texture it gives to breads. Order a month's supply of New Fleischmann's Royal Fast Rising Dry Yeast today. At your grocer's!

The General Store

The general store is among the oldest of our institutions. From the smallest of our communities to our great cities the general store serves and sells, even though in metropolitan centres they are designed as "departmental" stores, they still follow the pattern and plan of the early general store in endeavoring to fill the buying needs of every member of the community.

Just as in the beginning of the small town general store such places served as post office, meeting place and political forum the present day general store is the recognized meeting place and its genial proprietor even today serves as family, friend and counselor, postmaster and banker. While his limited capital and outlet prevents him from carrying the immense stock his big city cousin carries the country general store operator will get what ever his customers need by means of his special order service which he uses to satisfy his customers.

Contrary to what many may think your general store oftentimes can save you money in not part of your purchases but

Legion Notes

A meeting of the Carbon branch was held in the Legion Hall on Monday. There was a good attendance at this first meeting of the year. This should be a good year for the branch if the first meeting attendance keeps up and give the officers encouragement and support as they did at this meeting. Six new members were admitted to the branch. Also the new officers were installed. The year: Past president, L. F. Poxon; president, J. Cooper; vice president, Finlay Code; Sargeant at arms, R. Hay; executive, S. Cannings, M. Switzer, C. Goldhamer, D. Gilbert and J. Woods; hall committee: A. Bramley, F. Schmierer, Walter Permann; entertainment committee, V. Hawkins, D. Gilbert, S. Churchill, D. Code, Leslie Obbegy; investigations and sick committee, president, vice president and secretary.

In future the rental of the hall will be done by seeing our caretaker, A. Bramley, and if you are using the hall and you expect it to be heated the caretaker must be notified. See him also before putting out notices of any meeting to be held so that you know the evening is open. Local organizations may secure the use of the hall for an evening or day provided it does not conflict with the operations of the I.O.D.E. or the Legion branch. No year round contracts will be taken, each time the hall is needed the parties concerned must secure the hall through A. Bramley.

The Legion members wish to thank the I.O.D.E. for their invitation to the social evening.

The Parcels to Britain Fund is still open for donations and \$50 has been sent and we have \$4.59 towards the second \$50 order so turn in your donations now to M. Switzer, Dusty Poxon or C. Cave. Receipts will be given and donations are deductible from your income tax.

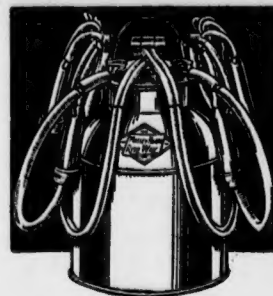

There will be a meeting of the executive and entertainment committees in the Legion Hall on Saturday, Feb. 7 at 2.30 p.m. All those who can please attend this important meeting.

C. Cave, Sec.

Method For Computing Annual Feed For One Hen

According to recent studies at the University of Illinois College of Agriculture, a laying hen requires about one pound of dry feed for each seven eggs laid.

These studies further reveal that a hen laying 140 two ounce eggs a year needs, for egg laying alone, 20 pounds of dry feed beyond her requirements for all other purposes. A hen laying 105 eggs needs only 15 pounds of extra feed while one laying 280 eggs annually requires 40 pounds.

In order to compute the total feed required for one hen for a year the following table was prepared:

Multiply the live weight of the bird by eight and add 25. Divide the total number of eggs the hen lays by seven and add this figure to the total obtained by the first two steps.

Example:
Weight of hen, 5 pounds
5 x 8 equals 40
40 plus 25 equals 65
Hen lays 105 eggs per year
105 divided by 7 equals 15
Total feed required per year,
65 plus 15 equals 80 pounds.

Bond Prices Fall

For the first time in 10 years the Canadian financial community is no confronted with the task of making up its own mind on the value of Canadian government bonds.

For nearly a decade this problem had been daily decided by the Bank of Canada by its list of quotations. Now the Bank has "pulled its bids".

Where would Dominion bond prices level off? Best guess was around 280 percent basis for long terms.

The argument was that any lower price, or higher yield would likely result in a torrent of Savings Bonds redemptions, up to the fact that these carried a 2.75 percent coupon liquidation could be expected when a better rate could be obtained in other issues.

Why did the Bank of Canada take this action

To help fight inflation, is at least part of the answer. Higher interest rates is "the classic" method of fighting rising prices. Because its action means nudging interest rates higher.

To conform with what has already happened in the United Kingdom and the United States is another part of the answer.

First Kid: You got a new baby at your house? Whereja git him

Second Kid: Doctor Brown bring him.

First: We take from him too.

By
DR. F. J. GREANEY,

Line Elevators Farm Service,
Winnipeg, Manitoba.

On the Life-Span of Weed Seeds
Many weed seeds, as farmers know too well, can remain alive in the soil for years. In the literature there are many accurate records of weed seeds that have lain in the soil for decades, still dormant but capable of germination.

Buried Seed Tests.—In May 1879, Beal buried in the soil several bottles of each of a number of different kinds of weed seeds. Each bottle contained a mixture of weed seeds and sand. At intervals of five years one bottle of each kind of seed was dug up and germination tests were made with the seeds. Seeds of Black Mustard were still germinable, even after 50 years in the soil. After a burial period of 30 years, seeds of several other weeds including Common Plantain, Perslane, Pigweed, Curled Dock, Chickweed, and Ragweed were still alive. These results, and those of several other reliable buried seed tests, show that the seeds of many persistent weeds retain their ability to germinate for long periods in the soil. It is impossible, of course, to control such weeds merely by plowing the seeds under, for the weeds will outlive any practical crop rotation.

Weed Control.—Remarkable progress has been made in recent years in the control of weeds by chemical means. Line Elevators Farm Service believes that prairie farmers are among those who stand to benefit greatly by the proper use of 2,4-D and other new weed-killing chemicals. Nevertheless, chemicals are not going to provide the complete answer to all our weed problems. The fact that the seed of many weeds remain in the soil for long periods in a dormant viable condition means that our prairie soils are always well stocked with weed seeds. This fact alone dictates that, for many years to come, good cultural and other sound farm practices will remain the chief method of eradicating some of Western Canada's most persistent and dangerous weeds.

6th Consecutive Patronage Dividend To Pioneer Customers

If you delivered grain to us between August 1st, 1946, and July 31st, 1947, kindly call at our elevator and receive your patronage cheque.

We have paid a patronage dividend each year since the 1941 crop on all grain delivered to Pioneer elevators.

It is also our intention to pay a patronage dividend on this year's business, if our elevator earnings permit.

Patronage Dividends Paid in Cash Each Year Since 1941
